BOX AMBULANCE ICU

”

Mercedes sprinter chassis is manufactured by adding a box onto the ambulance. It can be produced as both emergency helping or patient transferring. A box, which is made from sandwich panels, is installed onto the ambulance chassis. The profile thickness used in the case is 25mm. It is possible to reach the oxygen and stretcher group from out of the ambulance via an explicit cupboard. There is a stretcher carrying platform, which has a movement among the left and right sides. Also, there is a ramp in order to help stretcher to get out of the ambulance easily. There are defibrillator and ventilator devices in the ambulance.

AMBULANCE EQUIPMENTS

MAIN STRETCHER

It is designed as folding type stretcher. When it is not used, it can be stored as its folded. It has 2 adjustable strap, two double handles and a double wheel. Sitting and reclining sections are not made of flammable, stain-resistant and non-allergenic material.

Technical Specifications

	Min.	Max
Lenght	155cm	195cm
Width	55cm	60cm
Height	230cm	450cm
Height	80cm	90cm
Weight	30kg	40kg
Carrying Capacity -		250kg

CHAIR - FOLDABLE STRETCHER

It is designed as folding type stretcher. When it is not used, it can be stored as its folded. It has 2 adjustable strap, two double handles and a double wheel. Sitting and reclining sections are not made of flammable, stain-resistant and non-allergenic material.

Stretchers are our own production which can be made by special orders as desired size and specifications.

Technical Specifications

Lenght (Min. - Max.)	135 - 180 cm
Width	530 cm
Height (stretcher)	200 cm
Height (chair)	135 cm
Weight	11,5 kg
Carrying Capacity (max) 280 kg

VACUUM STRETCHER

Vacuum stretcher is a set with a fast and hand-operated vacuum pump. When the patient is placed on it, the side handles and the belts provide easy and safe transportation. X-ray beams can be passed through the stretcher.

Technical Specifications

Length	190cm
Width	85cm
Height	5cm
Weight	5kg
Carrying Capacity	180kg

SCOOP STRETCHER

Scoop stretcher was designed to suit the patient with adjustable straps. Scoop Stretcher frame is lightweight and easy to use parts of the X-ray beam.

Technical Specifications

Length (Max.)	207 cm
Length (Min.)	167 cm
Width(Head)	32 cm
Width(Head)	42 cm
Height 6	cm
Weight 8	kg
Carrying Capacity	250 kg

SPINE BOARD (PEDIATRIC) - RESUSCITATION BAG

Spine Board is for transporting the patients who have injuries at their backbones. The patient is available to secure the seat belts. Hardened-resistant plastic material and is water resistant. Spine head stabilizer used in my board suitable for use with the neck and brain in depression.

Stretchers are our own production which can be made by special orders as desired size and specifications.

Original Carrying Case Made of polyurethane. Bag shoulder belt is made of soft and durable material. From bag to carry and transport at least two side handles. Pouch generally occurs in three parts; the first part: laryngoscope set, reflex hammer, Magil forceps, diagnostic set, the second part: portable oxygen kit, balloon valve mask, airway intubation tubes and tubes, in the third part: disposable material

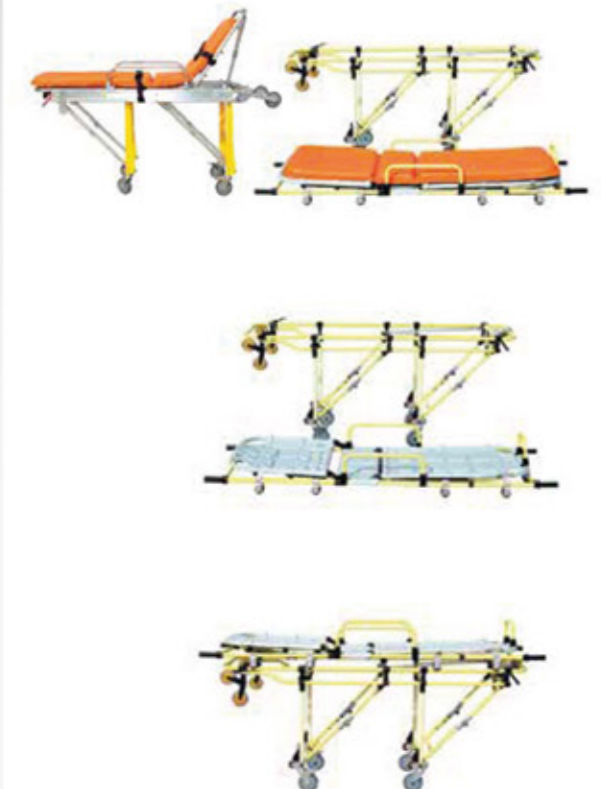

TRANSFER STRETCHER - STRETCHER PLATFORM

Transfer stretcher can be loaded and by one person into the ambulance. It has 3 pieces of seat belt and it can be laid by adjustable handle makes. It has mattress which is anti-bacterial, flame retardant and easy to clean.

Stretcher platform provide an easy and stable position for main stretcher. It is made of stainless steel.

All of our stretchers has EN 1865 certificate and they have availability report according to EN 1789 + A1 standards for ambulance usage.

BARIATRIC STRETCHER AND STAIR STRECHER WITH PALLET

This is a special type of stretcher which is designed for obese patients. This stretcher minimizes the effort needed for the transporting the patients. Removing the ability to move safely with the patient.
